

Launch of COVID-19 Clinical Management Support System

The European Commission has launched the “COVID-19 Clinical Management Support System”. The system facilitates access to newly acquired knowledge on how to manage COVID-19 and helps to create rapid connections across Europe among the hospitals indicated by the Member States as reference centres for COVID-19.

Clinicians can rely on a dedicated help-desk managed by DG SANTE to set up web conferences and exchange with their peers in Europe on possible treatments, and on how to handle severe and complex cases.

This action aims to reduce some of the uncertainties due to the unknown aspects of the virus and it recognises that there are differences in experience and the number of cases treated across the EU, with some hospitals starting dealing with complex patients only recently.

For more information and to join the system please email:
